

### Theme 6 Performance Task/Peer Assessment Form

The main purpose of peer evaluation is to provide constructive feedback that contributes to the learning of group members. Therefore, evaluations should be made independently of personal relationships, in a fair and objective manner. Comments should be based on concrete observations and expressed using respectful and positive language. When pointing out areas for improvement, the term “can be improved” should be preferred, as this makes the evaluation more constructive. In addition, peer evaluation helps both the members being evaluated and the evaluators themselves gain awareness of their own learning.
